

GF-Lite Dolly

A stable, lightweight, platform dolly designed to run on pneumatic or track wheels.

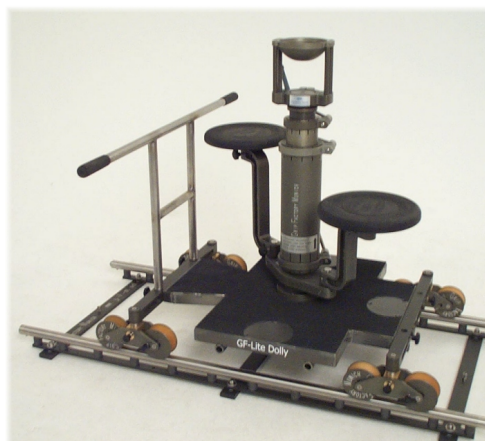

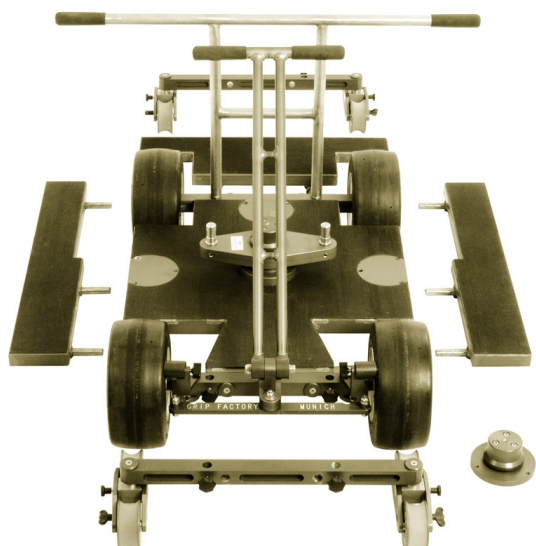

The quick release wheel axles enable a fast changeover to the required mode without having to turn the base upside down. Extra, add-on platforms are available to increase the size of the base. An optional pushbar can be attached to the front or rear of the base.

The GF-Lite Dolly is made of high grade aluminium which is then hard coated. The base and platforms are fitted with a non-slip rubber mat.
